

LaZee Mouse™ PRO

Data Sheet

Model #

LMP-101

FEATURES

- Clicks via Microphone
- Designed to fit the User
- Quick & Easy Setup
- Easy to Operate
- No Software Required
- Uses no processor resources
- Platform Independent (PC, MAC, Unix)
- Compatible with All Hardware & Software
- Works in conjunction with all mice, trackballs, touchpads, etc..
- Extended Warranty Options
- Custom Modifications available
- 2 Year Warranty
- CE ROHS

SPECIFICATIONS

- LaZee Mouse™ Unit
- Size: 1.5" x 4.0" x 5.5"
- Weight: 1.5 ounces
- Mic Input: 3.5mm Standard Mic
- Operating Temp: 0 - 35C
- ESD - Standard ESD Precautions

System Requirements

- Electrical: Powered USB Port
- Software Compatibility:
 - Windows™ XP thru 10 & RT
 - OSX™ ; 8.0 and above,
 - Android, Unix, Linux & more

Contents of Package

- LaZee Mouse™ PRO Unit
- USB Cable
- Operating Instructions

General Description

LaZee Mouse™ PRO is part of the **LaZee Mouse™** family of computer input devices, that provide hands-free computer access for people with a wide range of disabilities. This remarkable product provides full mouse functionality and is engineered to integrate with each user's unique abilities. This sensational development frees the mouse functionality from the user's hand and allows the user to decide where best suits their needs.

These extraordinary devices are compatible with all hardware and software products. They are portable and interchangeable between laptops, desktops, MACs, PCs, and Unix systems, and can be used simultaneously with other pointing devices. Universal Design concepts allow us to provide special orders at a modest cost.

Cursor Control

This fully self-contained unit uses internal tilt sensors for full cursor control, and is often worn and "tilted" to initiate cursor movement. Tilting on two axis' activates up/down and left/right cursor control. The sensor is "calibrated" to the user by initiating the home button, effectively operating as a joystick in space. MEMS technology provides extremely precise, fully proportional cursor control.

Extremely lightweight, this unit is well suited for use on the head, as well as other locations. Weighing less than 2 ounces, this unit can literally be worn from "head-to-toe" and activated by body movements, or mounted to an object, and manipulated by the user. The unlimited possibilities for unit placement and activation, are designed to accommodate the user's abilities.

Button Functions (Click/Drag)

The PRO model utilizes an external microphone to control Button functions. The user performs left clicks, right clicks, and right or left drags by making sound. The length of sound determines which button function is generated. Spoken words, whistling, blowing, or puffing into the microphone create sound pressure, any of which can be utilized to generate button functions.

The user decides how to configure the button functions.

- A gain control allows the user to adjust the microphone sensitivity to their environment
- A DIP switch selects between clicking options
