LaZee Tek Announces Substantial Price Reductions!

Ashley, IN -- September 30, 2006 -- LaZee Tek announced today a substantial reduction in the retail price of its popular LaZee Mouse Family of computer access products. Our reusable design strategy has provided huge development cost savings" said Jim Kjendalen, company President. "This combined with the fast growing popularity of the product has helped us to recoup some of our development costs ahead of plan. We hope as popularity of the LaZee Mouse products continue to increase, that prices can be lowered proportionately!"

The new prices are **effective immediately** New retail prices for the LaZee Mouse family are as follows:

- LaZee Mouse **PRO**-----\$799
- LaZee Mouse **SWITCH**----\$649
- LaZee Mouse **CURSOR**--\$499

### 3rd Party Software

~~~~~

As an aid to our customers, we are working to put together a collection of various software programs that can help make computers even more easier to access. We will also be including this package on CD with each unit sold.

There will be a mix of the following types of programs.

- Screen Magnifiers
- On Screen Keyboards
- Large Cursors
- Clicking Software

Many of these programs are freeware & shareware, while others are 30 day demo versions of retail products.

If you have a product suggestion for us to include in this collection or in the also new useful link section, please drop us a note at info@lazeetek.com

Mounting Tip

~~~~~

Be CREATIVE, and think outside the box when it comes to using a LaZee Mouse. While these devices can operate as a "HeadMouse", they can also be operated **ANYWHERE** the user is capable. From using them on a **foot** to rolling one around on a **tabletop**, there are no limitations to the flexibility of how & where a LaZee Mouse is used.

The LaZee Mouse is unique in that it fits into more than just one of the existing categories of computer access devices on today's market. It begins with the characteristics of a Headpointer, adds the functionality of a body sensor, and does away with the need to load software.

**The HEADMOUSE isn't just for the head anymore!**
