Hands-Free Computer Controls

FOR IMMEDIATE RELEASE

LaZee Tek Announces Substantial Price Reductions!

Ashley, IN -- September 29, 2006 -- LaZee Tek announced today a substantial reduction in the retail price of its popular LaZee Mouse Family of computer access products. "Our reusable design strategy has provided huge development cost savings" said Jim Kjendalen, company President. "This combined with the fast growing popularity of the product has helped us to recoup some of our development costs ahead of plan. We hope as the popularity of the LaZee Mouse products continue to increase, that prices can be lowered proportionately!"

The new prices are effective immediately, and are a reduction of 35-40% from earlier levels. The free demo program will remain in operation, which gives users the chance to test-drive these units before purchasing. New retail prices for the LaZee Mouse family are as follows:

LaZee Mouse PRO	\$799
LaZee Mouse SWITCH	\$649
LaZee Mouse CURSOR	\$499
